OCTGRAM

SOLUTION PROPOSAL

OPERATIONS TRANSFORMATION INITIATIVE

SweafEx Operations CRM

A centralized operational platform designed to unify SweafEx's end-to-end freight lifecycle — connecting customer enquiries, rate boards, vehicle assignments, live trip tracking, and WhatsApp automation alongside Zoho.

Single EXP ID
One permanent trip identity across operations, customer updates & billing.

Zero-Install Portals
Instant mobile web links for field drivers and corporate customers.

Zoho Coexistence
Preserves Zoho for accounting while powering operations in Octgram CRM.

PREPARED FOR
Whooosh Networks Pvt Ltd (SweafEx)

EXECUTIVE SUMMARY

Unifying SweafEx Freight Operations

A high-impact operational CRM that transforms fragmented WhatsApp and spreadsheet workflows into a streamlined, automated operational system.

The Strategic Objective

SweafEx operates a fast-growing Full Truck Load (FTL) freight brokerage across South India. To support rapid scaling, Octgram proposes a dedicated **Operations CRM** that centralizes customer enquiries, vendor quotes, vehicle placement, 13-stage trip milestone tracking, and POD collection — while seamlessly integrating with SweafEx's existing **Zoho setup** for accounting, billing, and financial reconciliation.

! Current Operational Landscape

- ✓ **8 WhatsApp Groups:** Critical trip data, rates, and documents trapped in chat threads.
- ✓ **Multiple Excel Sheets:** Customer quotes, vehicle details, and margins managed in disconnected files.
- ✓ **Repeated Data Entry:** Trip details re-typed across WhatsApp messages, emails, and bills.
- ✓ **Manual Follow-ups:** Team spends hours calling drivers for updates and following up on PODs.

✓ The Octgram CRM Solution

- ✓ **Single EXP Trip ID:** One permanent ID linking customer, vendor, vehicle, POD, and billing.
- ✓ **Dynamic Rate Board:** Real-time margin visibility with floor-price controls for management.
- ✓ **Automated WhatsApp:** Instant customer updates, auto-TCN dispatch, and payment reminders.
- ✓ **Preserved Zoho Setup:** Operational data flows directly to Zoho Books for financial processing.

Key Business Outcomes for SweafEx

100%	Zero	Live	Automated
Data Consistency (Single EXP ID)	App Friction for Drivers/Vendors	Trip Margin & Profit Visibility	WhatsApp Milestone Updates

CURRENT OPERATIONAL CHALLENGES

From Fragmented Operations to One Connected Workflow

As trip volumes expand, operational friction arises from disconnected tools rather than team performance.

TODAY'S FRAGMENTED COMMUNICATION PATH

Customer Enquiry → WhatsApp Chat Thread → Sales Team Excel Sheet → Purchase 8 WA Groups → Transporter Driver Call → Zoho Manual PO

Challenge 1 Manual Trip ID Transcription

Trip IDs are typed manually across WhatsApp, Excel sheets, and email drafts, creating mismatches between operational updates, vendor POs, and customer invoices.

Challenge 2 Operational Data Trapped in Chat

Rates, driver details, and loading timestamps live in WhatsApp chat histories, making them unsearchable, difficult to audit, and inaccessible to management in real time.

Challenge 3 Physical POD Bottlenecks

Tracking physical hard copy PODs across multiple trips is managed manually, delaying vendor balance settlements and slowing down customer invoice generation.

Challenge 4 Invisible Real-Time Margins

Customer rates and vendor costs are recorded in separate places. Management cannot easily verify trip profitability until month-end accounting reconciliation.

The Path Forward

These bottlenecks are natural milestones for a fast-scaling freight business. Octgram CRM bridges these gaps by acting as the unified operational backbone — giving the sales, purchase, and operations teams dedicated workspaces while maintaining clean data handoffs to Zoho.

TARGET ARCHITECTURE

One Trip. One EXP. One Source of Truth.

Every operational event, document, communication, and financial record links permanently to a single EXP Trip ID.

THE UNIFIED TRIP LIFECYCLE PIPELINE

01. ENQUIRY	02. RATE BOARD	03. ORDER & EXP	04. MILESTONES	05. POD & BILLING
Auto ENQ ID from WhatsApp/Web	Vendor quotes & margin check	Vehicle placed & EXP Trip created	13 Live updates & auto-TCN	5-stage POD & Zoho invoice

What Changes with the Single EXP ID?

- ✓ **Permanent System Lock:** Once an EXP Trip ID is generated on vehicle placement, it is locked and auto-populates all records.
- ✓ **Elimination of Transcription Errors:** Drivers, coordinators, and accounts staff always reference the identical trip code.
- ✓ **Complete Traceability:** One click from the EXP record opens the original customer enquiry, vendor quotes, RC/DL verification, signed TCN, POD photos, and Zoho bill.

★ Operational Integrity Guarantee

- ✓ **Role-Based Discipline:** Sales sets rates, Purchase places verified vehicles, Accounts approves payments, and Operations monitors margins.
- ✓ **Structured Communication:** WhatsApp is preserved as the communication channel, while Octgram CRM becomes the system of record.
- ✓ **Auditable Compliance:** Every timestamp, user modification, and document upload is logged permanently.

Core Principle

Zoho is the financial record. WhatsApp is the communication channel. Octgram CRM is the operational engine that connects them.

PLATFORM SCOPE

Everything Your Operations Team Needs — In One Place

A modular CRM built around SweafEx's specific departmental roles and operational workflows.

1 Customer & Sales Management

Sales Coordinators & Sales Backend

- ✓ **Customer Master:** Profiles, billing GSTINs, credit terms, and invoicing preferences.
- ✓ **Enquiry Hub:** Multi-channel capture with auto-generated ENQ references.
- ✓ **Quote & Rate Board:** Real-time margin guidance and approved price floors.
- ✓ **Order Conversion:** 1-click conversion of enquiries into confirmed Orders (ORD).
- ✓ **Communication History:** Complete log of customer interactions and spec changes.

2 Vendors & Fleet Management

Purchase Coordinators

- ✓ **Vendor Master:** Transporter profiles, fleet types, PAN, GSTIN, and bank accounts.
- ✓ **RC & DL Verification:** Verification workflow via external verification APIs.
- ✓ **Document Repository:** RC, DL, Insurance, PAN, Passbook, and truck photos.
- ✓ **30-Day Expiry Alerts:** Proactive alerts before vehicle/driver documents expire.
- ✓ **Transporter Ratings:** Historical on-time performance and reliability scores.

3 Trip Operations & Milestones

Operations & Purchase Teams

- ✓ **EXP Trip Console:** Core operational screen binding vehicle, route, driver, and load.
- ✓ **13-Milestone Tracking:** Granular checkpoints from loading transit to delivery.
- ✓ **Auto TCN Generation:** Pre-filled Trip Confirmation Notes created at loading.
- ✓ **5-Stage POD Tracker:** End-to-end physical & digital POD monitoring.
- ✓ **Driver Portal:** Zero-install mobile web page for milestone and photo uploads.

4 Management & Financial Control

Operations Manager & Accounts

- ✓ **Live Margin Intelligence:** Real-time gross margin (INR & %) visible per trip.
- ✓ **Overdue POD Alerts:** Escalation dashboard for POD hard copies pending > 7 days.
- ✓ **TDS Compliance:** 2% Section 194C deduction rules or non-TDS certificate checks.
- ✓ **Daily Billing Sheets:** Auto-compiled completed trips for 1-click Zoho invoicing.
- ✓ **Executive BI:** Route profitability, conversion rates, and carrier analytics.

ENQUIRY MANAGEMENT

From Inbound Enquiry to Confirmed Order

A fast, structured rate board workflow that speeds up quoting while protecting gross margins.

1 **Omnichannel Enquiry Capture**
Captures enquiries from WhatsApp Business API, Website forms, Social Media, or manual phone intake. System assigns permanent **ENQ001** number and sends 60-second WhatsApp auto-acknowledgment.
ENQ Generated

2 **Purchase Team Quoting (Up to 4 Vendors)**
Purchase Coordinator logs up to 4 vendor quotes with rates and availability. Customer identity is automatically masked in vendor-facing outreach to preserve commercial confidentiality.
Quotes Logged

3 **Rate Board & Margin Guard**
Operations Manager sets Customer Rate Range (Min/Max). Rate Board calculates gross margin in real time. Sales Coordinator is alerted if a quoted rate drops below the margin floor.
Margin Verified

4 **Order Confirmation (ORD Created)**
Customer confirms booking. System generates official Order (ORD), sets POD-NA requirements, and automatically passes the requirement to Purchase for vehicle placement.
ORD Confirmed

Actionable Lost Business Intelligence

When an enquiry does not convert, the system mandates a closure reason from a standardized dropdown:

Rate Difference | Customer Arranged Own Vehicle | Vehicle Size Unavailable | Customer Unresponsive | Other

This data gives management clear visibility into pricing gaps, unavailable vehicle types, and high-demand routes that need additional transporter onboarding.

VERIFICATION & TRUST

Know Who and What You Are Putting on the Road

Standardized onboarding checklists and external API verifications to protect cargo safety and legal compliance.

Digital Verification Workflow

Vendor & Vehicle Entry
Transporter selected from Master; truck & driver details logged.

API Verifications (RC & DL)
Instant verification of vehicle RC and driver license validity.

Mandatory Document Checklist
Enforces upload of RC, DL, PAN, Bank Details & Truck Photo.

Verified & Vehicle Placed
EXP ID generated; vehicle placement message formatted.

Proactive Expiry Governance

The CRM tracks document validity across SweafEx's entire vendor base:

- **30-Day Expiry Alerts:** Automated notifications to Purchase Coordinator before vehicle RC, insurance, or driver DL expires.
- **System Placement Gate:** Hard block preventing vehicle placement if mandatory documents are missing or expired.
- **Registered Bank Enforcement:** Restricts all payout instructions exclusively to verified bank accounts in the Vendor Master.

Third-Party Verification APIs (Pricing Placeholders)

External Passthrough

VERIFICATION SERVICE	OPERATIONAL PURPOSE	ESTIMATED PRICING
Vehicle RC Verification API	Validates vehicle fitness, insurance, owner name & tax status via Vahan.	[TO BE CONFIRMED]
Driver DL Verification API	Verifies driver identity and transport vehicle license validity via Sarathi.	[TO BE CONFIRMED]
GSTIN & E-Way Bill API	Party GST validation and single-click E-Way Bill verification where applicable.	[TO BE CONFIRMED]

** Note: External verification capabilities and response schemas depend on the selected third-party API provider's tier and governmental availability. Costs will be passed through transparently without markup.*

TRIP EXECUTION

Every Trip, Tracked From Start to Finish

Structured tracking across the 13 SOP milestones with real-time timestamps and automated customer alerts.

13 Granular SOP Milestones (Simplified Stages)

1	**Started** Truck departs for loading	2	**Loading Transit (1–2)** En route to pickup
3	**Reached Loading** Truck at pickup point	4	**Loading Started** Auto-generates TCN PDF
5	**Bills Received** Material & e-way bill checked	6	**Unloading Transit (1–3)** Main transit updates
7	**Reached Unloading** Truck at destination	8	**Unloading Done** Cargo safely delivered
9	**POD Soft Received** Driver uploads signed TCN	10	**Trip Completed** Ready for billing & payout

What the Operations Team Sees

EXP001245 In Transit Updated 14:32

Route: Bangalore (560068) → Chennai (600001)
Customer: ABC Manufacturing Ltd
Vehicle: KA01AB1234 (32ft Multi-Axle)
Driver: Ramesh Kumar (+91 98XXX XXXXX)
Current Leg: Unloading Transit Leg 2
Gross Margin: ₹4,500 (12.8%)

RC Valid DL Valid TCN Sent POD Pending

Trip Confirmation Note (TCN) Auto-Generation

When the **Loading Started** milestone is triggered, the CRM automatically generates a pre-filled TCN PDF combining vehicle, driver, and load details. The Sales Backend shares this with the customer via WhatsApp in 1 click, and the signed return copy doubles as the primary Proof of Delivery (POD).

WHATSAPP BUSINESS API

Keep Customers Updated — Automatically

WhatsApp remains the customer's familiar communication channel, while the CRM controls and records every message.

ENQUIRY ACKNOWLEDGMENT — **AUTO • < 60S**

"Hello! Thank you for choosing SweafEx. Your freight enquiry has been registered with reference **#ENQ00124**. Our pricing team is working on the best route quotes for you."

Delivered via Company WA

VEHICLE PLACEMENT ADVISORY — **MANUAL 1-CLICK**

"Vehicle placed for Trip **#EXP001245** (BLR → MAA). Vehicle: KA01AB1234. For any live updates, please contact our dedicated Logistics Coordinator at +91 99XXX XXXXX."

Delivered via Company WA

TCN & MILESTONE UPDATES — **AUTO ON TRIGGER**

"Your shipment has completed loading. Please find the attached Trip Confirmation Note (TCN). Live status: **In Transit to Destination**."

Delivered with PDF attachment

POD & DELIVERY NOTICE — **ON UNLOADING**

"Trip **#EXP001245** has been successfully delivered in Chennai. The soft copy of your signed POD has been uploaded and is available for download."

Delivered via Company WA

Automated Payment Follow-Up Cadence

- **Day 7:** Courteous WhatsApp payment reminder with invoice attached.
- **Day 14:** Second reminder + CRM dashboard prompt for Sales follow-up call.
- **Day 21+:** Escalation notification to Operations Manager dashboard.

WhatsApp API Commercials

WhatsApp Business API charges: `[TO BE CONFIRMED]`

Subject to Meta official conversation rates and selected provider plans.

ZERO-FRICTION ACCESS

No App Downloads. No Complicated Interfaces.

Designed specifically for corporate clients and on-the-road drivers operating directly from mobile web links.

Customer Mobile Workflow

Client Self-Service via WhatsApp Link

1. Customer taps secure WhatsApp magic link
2. Views live trip milestone timeline & ETA
3. Downloads generated TCN and GST Invoice
4. Acknowledges digital POD on completion

Result: Reduces inbound status phone calls by over 70%.

Transporter / Driver Workflow

Fast Mobile Web Checkpoints

1. Driver receives placement link on phone
2. Uploads truck photo & taps milestone status
3. Snaps photo of signed TCN at delivery
4. Automatically triggers balance payout workflow

Result: Instant POD photo capture without demanding app installs.

Designed for Real-World Road Conditions

Field drivers frequently operate in low-bandwidth regions and resist downloading heavy mobile applications. Octgram's mobile web pages load in under 2 seconds, consume negligible data, and provide large, intuitive one-tap buttons for milestone updates.

SYSTEMS COEXISTENCE

Works Seamlessly With Your Existing Zoho Setup

Octgram powers daily freight operations, while Zoho continues handling trusted financial accounting.

OCTGRAM CRM — Operational Layer

- ✓ Customer & Vendor Master Management
- ✓ Enquiry Management & Lost Reasons
- ✓ Dynamic Rate Board & Margin Floor
- ✓ EXP Trip ID Generation & Locking
- ✓ RC / DL External Verification
- ✓ 13-Milestone Real-Time Tracking
- ✓ 5-Stage POD Lifecycle Tracking
- ✓ WhatsApp Automation & Templates
- ✓ Customer & Vendor Mobile Web Links
- ✓ Operations BI & Executive Dashboards

ZOHO (BOOKS / SUITE) — Financial Layer

- ✓ Purchase Orders & URPM Purchasing Memos
- ✓ Vendor Bills & Section 194C TDS (2%)
- ✓ Vendor Advance (90%) & Balance (10%) Bills
- ✓ Official GST Customer Invoices
- ✓ Customer Payment Receipts & Credit Notes
- ✓ Bank Account Reconciliation (NEFT/IMPS)
- ✓ General Ledger & Statutory Accounting
- ✓ Chartered Accountant / Tax Filings
- ✓ Corporate Balance Sheets & P&L

How the Two Systems Connect

When a vehicle is placed in Octgram CRM, a purchase order draft is prepared. When a trip completes and POD is verified, completed trip data automatically compiles into a daily billing sheet for one-click GST invoice generation in Zoho Books. This eliminates double entry without disrupting SweafEx's established accounting workflows.

MANAGEMENT VISIBILITY

Management Gets a Real-Time View of the Business

Real-time operational dashboards replace manual phone updates and retrospective spreadsheet calculations.

Active Trips Today	Average Gross Margin	Pending Hard Copy PODs
24 Trips	**13.4%**	**8 Pending**
18 In Transit • 6 Loading	₹4,250 avg per trip	2 Overdue (> 7 Days)

Key Operational Intelligence Modules

- ✓ **Route Margin Analysis:** Compare profitability across Bangalore, Chennai, Hyderabad, and Coimbatore corridors.
- ✓ **Enquiry Conversion Rates:** Track lead conversion percentages by customer and lead source.
- ✓ **Vendor Reliability Scoring:** Transporter placement turnaround times and milestone adherence.
- ✓ **POD Aging Matrix:** Instant breakdown of PODs pending soft copy vs. physical hard copy delivery.

Financial & Recovery Insights

- ✓ **Receivables Aging:** Day 7, Day 14, and Day 21+ invoice aging buckets.
- ✓ **Vendor Balance Holds:** 10% balance payout status linked directly to physical POD receipt.
- ✓ **TDS Deduction Ledger:** Complete Section 194C deduction history ready for tax filing.
- ✓ **Daily Billing Reconciliation:** Instant view of completed trips awaiting invoicing.

Management Autonomy

The Operations Manager no longer needs to wait for weekly Excel consolidations. The dashboard provides an instantaneous, transparent view of daily freight velocity and company gross margins.

ACCESS & COMPLIANCE

Built for Controlled Business Operations

Strict departmental role boundaries, external data isolation, and verified banking workflows.

Role-Based Access Control (RBAC)

ROLE	OPERATIONAL VISIBILITY SCOPE
Sales Coordinator	Enquiries, Customer CRM, Orders, Trip Status.
Purchase Coord.	Vendor Master, Quotes, Trip Placement, POs.
Sales Backend	Shared WA Business, Routine TCN/Invoices.
Finance / Accounts	PO Approvals, Payouts, Invoicing, Reconciliation.
Operations Manager	Full access, Rate Board overrides, BI reports.

Data Isolation & Security

- ✓ **External Tenant Isolation:** Customers can only view their own trips. Transporters only see assigned trips.
- ✓ **Immutable Audit History:** Every price adjustment, milestone update, and spec change logs the user identity and exact timestamp.
- ✓ **Anti-Fraud Bank Governance:** Payout requests are strictly bound to registered vendor bank accounts — blocking personal UPI transfers.
- ✓ **Encrypted Document Vault:** Secure cloud storage for RC, DL, signed TCNs, material bills, and POD photos.

Shared WhatsApp Business Number Protocol

To prevent the Sales Coordinator from being overwhelmed with routine updates, the **Sales Backend** shares the official Company WhatsApp Business account to handle automated TCN delivery, POD submissions, and invoice sharing. The Sales Coordinator remains focused on customer relationships and price negotiations.

IMPLEMENTATION PHASES

From Current Process to Live Platform

A practical, milestone-driven delivery process designed to ensure zero operational disruption.

1 **Phase 1: Discovery & Workflow Design** — Weeks 1 – 2

Detailed review of SweafEx 15-step SOP, finalization of screen workflows, database schema modeling, and confirmation of third-party API providers.

2 **Phase 2: Core CRM Operations Engine** — Weeks 3 – 4

Buildout of Customer/Vendor Masters, Enquiry Hub, Rate Board with margin guard, EXP Trip creation, and Document management module.

3 **Phase 3: Automations & API Integrations** — Weeks 5 – 6

WhatsApp Business API webhook automation, external RC/DL verification integration, TCN generation engine, and Zoho financial workflow bridge.

4 **Phase 4: UAT, Staff Training & Live Go-Live** — Weeks 7 – 8

End-to-end UAT verification against all 14 SOP acceptance scenarios, Excel vendor/customer data migration, team training, and go-live hypercare.

Key Implementation Prerequisites

Final delivery timelines depend on third-party onboarding milestones: (1) Meta WhatsApp Business account approval, (2) Third-party RC/DL API provider contract finalization, (3) Zoho Books API access credentials, and (4) Timely customer UAT feedback.

SCOPE & INVESTMENT

Scope & Commercial Structure

A transparent investment structure outlining deliverables, external third-party services, and maintenance.

Included in Octgram Implementation

- ✓ Complete custom CRM development (13 modules).
- ✓ Rate Board & Margin Guard configuration.
- ✓ TCN auto-generation & 5-stage POD lifecycle.
- ✓ Customer & Driver zero-install mobile workflows.
- ✓ WhatsApp Business API automated workflows.
- ✓ External RC / DL verification integration.
- ✓ Zoho Books workflow integration bridge.
- ✓ Historical Excel data migration & team training.
- ✓ 30 days post-launch dedicated hypercare.

Third-Party Services (Passthrough Costs)

SERVICE	ESTIMATED COST
WhatsApp Business API	[TO BE CONFIRMED]
RC Verification API	[TO BE CONFIRMED]
DL Verification API	[TO BE CONFIRMED]
GST / E-Way Bill API	[TO BE CONFIRMED]
Cloud Infrastructure / Hosting	[TO BE CONFIRMED]
Zoho Subscriptions	**Existing / Client**

Commercial Proposal Summary

COMPONENT	DESCRIPTION	INVESTMENT (INR)
Platform Development	Custom Operations CRM core engineering & modules	₹ [_____]
Implementation & Deployment	Integrations, data migration, setup & training	₹ [_____]
Annual Maintenance & Support	SLA support, patches, monitoring & updates	₹ [_____]
Third-Party Services (Est.)	APIs, messaging & cloud hosting passthrough	₹ [_____]
Total Proposed Investment	Custom Platform Engineering & Launch	**₹ [_____]**

** Note: Third-party API, messaging, and hosting tariffs are billed directly by respective service providers or passed through at actuals without agency markup.*

ENGAGEMENT PATH

The Next Step

A straightforward 4–step path to initiate SweafEx's operations transformation.

Step 1 **Scope & Commercial Alignment**

Review this proposal, finalize the desired development timeline, and execute the service agreement.

Step 2 **Third-Party API Selection**

Jointly evaluate and select the preferred WhatsApp Business and RC/DL verification providers.

Step 3 **UI/UX & Workflow Sign-off**

Conduct collaborative design walkthroughs with SweafEx operations leadership to confirm screen layouts.

Step 4 **Sprint Kickoff & Deployment**

Commence Phase 1 sprint execution with weekly milestone demos and transparent progress tracking.
